MINIMUM SCORE

75% points required

COURSE OVERVIEW

The Full Stack JavaScript Training transforms beginners into complete Full Stack JavaScript programmers, empowering them to work in the technology market with practical and up-to-date knowledge. Throughout the course, we cover everything from the fundamentals of programming to the development of web and mobile applications, using the most relevant technologies in the JavaScript ecosystem.

The course is divided into four main blocks: Fundamentals, Front-end, Back-end, and Projects, providing a progressive and integrated learning experience.

EXAM OVERVIEW

In this module, the student understood the fundamentals of relational databases and learned to use PostgreSQL to create, manipulate, and manage information in a structured way. They studied the SQL language, applying commands for definition, insertion, querying, updating, and deleting data, in addition to working with relationships between tables and referential integrity. Through exercises and database modeling practices, the student consolidated their ability to design and implement complete and efficient data structures for real applications.
