75% points required

COURSE OVERVIEW

The Full Stack JavaScript Training transforms beginners into complete Full Stack JavaScript programmers, empowering them to work in the technology market with practical and up-to-date knowledge. Throughout the course, we cover everything from the fundamentals of programming to the development of web and mobile applications, using the most relevant technologies in the JavaScript ecosystem.

The course is divided into four main blocks: Fundamentals, Front-end, Back-end, and Projects, providing a progressive and integrated learning experience.

EXAM OVERVIEW

In this module, the student mastered the fundamentals of modern CSS, learning in practice how to create professional, flexible, and fully responsive layouts. Throughout the classes, they explored the concepts and properties of Flexbox and CSS Grid, understanding how to align, distribute, and organize elements efficiently. They also developed projects such as galleries, blogs, and dashboards, applying media queries to adapt the layouts to different screen sizes and color preferences. Upon completing the module, the student was able to structure modern and optimized interfaces, mastering the main layout techniques used in current web development.
