COURSE OVERVIEW

The Full Stack JavaScript Training transforms beginners into complete Full Stack JavaScript programmers, empowering them to work in the technology market with practical and up-to-date knowledge. Throughout the course, we cover everything from the fundamentals of programming to the development of web and mobile applications, using the most relevant technologies in the JavaScript ecosystem.

The course is divided into four main blocks: Fundamentals, Front-end, Back-end, and Projects, providing a progressive and integrated learning experience.

EXAM OVERVIEW

In this module, the student understood the essential fundamentals to begin their journey in programming, exploring how the web works and the role of the programmer in the development of modern applications. They learned the differences between Front-end, Back-end, and Full-stack, as well as the main operating systems and their influences on the development environment. Additionally, they became familiar with browser tools, the code editor, and the terminal, concluding with the installation of Node.js, a crucial step for running projects in JavaScript. This set of knowledge solidified the technical foundation necessary for the next steps in a developer's career.
