75% points required

COURSE OVERVIEW

The Full Stack JavaScript Training transforms beginners into complete Full Stack JavaScript programmers, empowering them to work in the technology market with practical and up-to-date knowledge. Throughout the course, we cover everything from the fundamentals of programming to the development of web and mobile applications, using the most relevant technologies in the JavaScript ecosystem.

The course is divided into four main blocks: Fundamentals, Front-end, Back-end, and Projects, providing a progressive and integrated learning experience.

EXAM OVERVIEW

In this module, the student explored in depth Next.js, understanding how the framework enhances React and simplifies the development of modern web applications. Throughout the classes, topics ranged from the main features and the creation of the first project to advanced themes such as routing, layouts, server actions, route handlers, loading states, error handling, and the use of middleware. Practical activities were also carried out, including styling, image optimization, font inclusion, database integration, and deployment on Vercel, consolidating mastery over the Next.js ecosystem and best practices for complete and high-performance applications.
