MINIMUM SCORE

75% points required

COURSE OVERVIEW

The Full Stack JavaScript Training transforms beginners into complete Full Stack JavaScript programmers, empowering them to work in the technology market with practical and up-to-date knowledge. Throughout the course, we cover everything from the fundamentals of programming to the development of web and mobile applications, using the most relevant technologies in the JavaScript ecosystem.

The course is divided into four main blocks: Fundamentals, Front-end, Back-end, and Projects, providing a progressive and integrated learning experience.

EXAM OVERVIEW

In this module, the student deepened their knowledge of the fundamentals of programming with JavaScript, understanding how the language works and interacts with the browser. They explored data types, variables, operators, and conditional and looping structures, learning to control flows and create efficient logic. Through practical exercises and simple projects, such as calculators, converters, and interactive menus, the student developed the skill to transform concepts into functional code. In the end, they grasped the necessary foundation to write dynamic and structured programs, consolidating their first step into the universe of programming logic.
