## COURSE OVERVIEW

The Full Stack JavaScript Training transforms beginners into complete Full Stack JavaScript programmers, empowering them to work in the technology market with practical and up-to-date knowledge. Throughout the course, we cover everything from the fundamentals of programming to the development of web and mobile applications, using the most relevant technologies in the JavaScript ecosystem.

The course is divided into four main blocks: Fundamentals, Front-end, Back-end, and Projects, providing a progressive and integrated learning experience.

## EXAM OVERVIEW

In this module, the student practically and progressively explored the fundamentals of HTML5, learning to structure web pages from scratch and to use its main elements and attributes. Topics such as headings, paragraphs, lists, links, tables, and forms were covered, along with modern HTML5 features focused on semantics and accessibility. Through guided exercises, the student developed complete pages, understanding good practices for organization and code optimization, as well as the importance of semantic structure in building accessible and professional websites. In the end, they solidified their foundation in web development by creating a complete project.
